**Abstract:** The butterfly fauna of Silent Valley National Park (SVNP) and its buffer zone in Kerala is discussed. Of the 335 species listed from the Western Ghats (WG) and 326 from Kerala, 269 species were recorded from inside the boundaries of the core of SVNP, while an additional 21 species were confirmed from its buffer zone making a total of 290 species as an aggregate for SVNP and its environs. This included 19 species of Papilionidae, 26 Pieridae, 85 Nymphalidae, one Riodinidae, 82 Lycaenidae, and 77 Hesperidae. Thirty-one species were strictly endemic to the Western Ghats and 63 species were listed in schedules of WPA 1972, and 19 species were in the IUCN Red Lists. The region harbours 89% of all butterflies of Kerala (326 species), and 87% of those seen in the Western Ghats (335 species). About 11% of butterfly fauna of SVNP is endemic to the Western Ghats. Silent Valley and adjoining regions have 86% of all IUCN Red listed species listed for Kerala and the WG. The region also holds 91% of the species listed under WPA known from Kerala and 90% of those listed from WG. Thus, SVNP and its environs are one of the richest regions with respect to butterflies.

**Keywords:** Lepidoptera, Checklist, endemics, grasslands, IUCN, Shola, WPA.

**Author details:** KALESH SADASIVAN, research associate at Travancore Nature History Society (TNHS), works on natural history of Western Ghats, and is primarily interested in the ecology, taxonomy and distribution of butterflies, odonates, cicadas and ants. SUJITHA PC, research associate at Travancore Nature History Society (TNHS), works on butterflies of Western Ghats and is currently working on lycaenid Myrmecophily. TOMS AUGUSTINE is a naturalist interested in birds, butterflies and odonates of Western Ghats especially their distribution patterns. E. KUNHIKRISHNAN is a retired faculty of zoology, who has worked extensively on Natural History and conservation of Western Ghats, and is a pioneer in butterfly research in Kerala. VINAYAN P NAIR, Zoology teacher at Government Vocational Higher Secondary School, Payyoli, Kozhikode and Research Associate at Travancore Nature History Society (TNHS), Trivandrum, Kerala. Currently involved in studying taxonomy of odonates of Western Ghats. Apart from odonates has specific interests in moths, butterflies, ants, mantids and wasps. M. DIVIN MURUKESH works on bird communities of Silent Valley and adjoining landscapes. BAJU K is a research associate in TNHS working on butterflies of Kerala and their lifecycles.

**Author contributions:** KS and SPC conceived the idea and wrote the primary draft. KS, TA, EK, MDM, BK did field work and corrected the draft. SPC and VPN worked on the final manuscript.

**Acknowledgements:** We are thankful to the Kerala Forest and Wildlife Department for the survey permits. We are thankful to Suresh Elamon, M. Jafer Palot, and George Mathew for providing references and constructive inputs on the manuscript. We are grateful to Jayakumar, Director, Manoj K, and other members of TNHS, Trivandrum for their field assistance.

## INTRODUCTION

Silent Valley National Park (SVNP) is located just north of the Palghat gap, on the southwestern slopes of the Nilgiri Landscape of the Western Ghats. The major portion of the division is in the Mannarkkad Taluk of Palakkad District in Kerala. A portion of the buffer zone is in Nilambur Taluk of Malappuram District. The area lies within the latitudes 11.03–11.22 °N and 76.40–76.53 °E. The Silent Valley Forest Division now comprises Silent Valley Range (143.52 km<sup>2</sup>) and the buffer zone of Bhavani Range (94 km<sup>2</sup>), thus making a total area of 237.52 km<sup>2</sup> (Image 1). The National Park and its buffer zone are surrounded by the reserved and vested forests of Attapady Range of Mannarkkad Division towards the east, Mannarkkad Range of Mannarkkad Division towards south & west, and Kalikavu Range of Nilambur South Division towards the north-west, and the forests of Mukurthi National Park of Tamil Nadu border on eastern limits (Anonymous 2012).

The terrain is generally undulating with steep escarpments and many hillocks. The elevation of this region ranges from 95 m at Thatthengalam to 2,383 m at the Anginda peak. Both the south-west monsoon and the north-east monsoon cause rains in this area. The major share, however, comes from the south-west monsoon, which sets in during the first week of June. The heaviest rainfall is during June, July, and August. As per data from weather recorded from forest sections the rainfall varies from 7,500 mm per year in the northern side to 2,800 mm (southeastern dry zone). The main drainage basins are of the river Kunthipuzha (Bharatapuzha) for the core zone, and Bhavanipuzha for the buffer zone (Nair 1991).

The average minimum temperature ranges 8–14 °C and the average maximum temperature varies 23–29 °C. The forests and environs of Silent Valley Division can be categorized into the following types based on Champion & Seth (1968): Southern Hill Top Tropical Evergreen Forest, West Coast Tropical Evergreen Forests, Cane Brakes, Wet Bamboo Brakes, West Coast Semi Evergreen Forests, West Coast Secondary Evergreen Dipterocarp Forests, Southern Sub-tropical Hill Forests, Reed Brakes, South Indian Sub-tropical Hill Savannah, Southern Montane Wet Temperate Forests, Southern Montane Wet Scrub, and Southern Montane Wet Grasslands (Image 2) (Nair 1991; Anonymous 2012). About 75–80% of the protected area is covered with thick woody vegetation and about 20% of the area has grasslands. The regions on the northwestern slopes have rich wet evergreen forests, while the southeastern borders have drier Dry Deciduous Scrub vegetation (Image 2).

The region has excellent biodiversity as exemplified by 2,000 species of plants, 41 species of mammals, 97 species of birds, 42 reptiles, and 46 amphibians reported there (Manoharan et al. 1999). The management plan of SVNP mentions 92 species of butterflies (Anonymous 2012). British naturalists like G.F. Hampson, J.A. Yates, W.H. Evans, and M.A. Wynter-Blyth, occasionally visited the region as gathered from their works, but the finer details of the visits are still unknown (Hampson 1888; Evans 1927; Yates 1935; Wynter-Blyth 1957). Larsen (1987a,b,c; 1988) briefly visited Mukkali in the 1980s while working on the butterflies of the Nilgiris District of Tamil Nadu. Yata & Gaonkar (1999) discovered and described new subspecies of *Eurema andersoni shimai* from Nilgiris, and mentioned the presence of this taxon as well as its host plants and flight periods. Mathew (1999) reported 96 species from SVNP during a study from 1987–1990. Mathew & Rahamathulla (1993) and Mathew (1994) surveyed butterflies and documented 100 species of butterflies. Reports of butterfly migrations were recorded from adjacent landscapes like Nilgiris by (Larsen 1978), and New Amarambalam Reserve Forest by Mathew & Binoy (2002).

No other published records are available on the butterfly fauna of this protected tract. There had not been any formally structured surveys for butterflies in the Silent Valley National Park and the first one was done by TNHS in association with SVNP in September 2016 with records of 180 species over a span of three days (Sadasivan & Jayakumar 2016). In this paper, we report 290 species of butterflies from SVNP, based on a review of past literature and our fieldwork in the region.

## MATERIALS AND METHODS

This paper is a compilation of the field data from the authors over the last two decades. The previous literature on butterflies of the region Hampson (1888), Larsen (1987a,b,c, 1988), Mathew & Rahamathulla (1993), Mathew (1994, 1999), and Mathew & Binoy (2002) were reviewed. The data logged in the management plan (Anonymous 2012) was also consulted, as well as the report on the first comprehensive invertebrate survey of SVNP done in 2016 submitted by TNHS to the Kerala Forest Department (Sadasivan & Jayakumar 2016). In addition, the field data of the authors from casual visits to the region and a 4-day expedition from Mukurthi to Mukkali was also added. The standard transect methodology (3 km in 3 hours) was employed in field surveys with strategically placed basecamps covering

Image 1. Silent Valley National Park.

all habitats and elevational gradients of the National Park. The core region was assessed using Walakkad, Poochipara, Sispara, Punnamala, Havelock, Neelikkal, and Sairandry as the basecamps. The areas sampled in the buffer zone were Keerippara, Kottappuzha, Mukkali, Panthanthodu, Thudukki, and Thatthengalam. Occasional visits were done to Karuvarakundu in wetter evergreen Nilambur slopes on the northwest side and Mukkali side in the southeast dry zone. For all calculation purposes, the butterfly fauna of the core of SVNP and its buffer are considered together. The general taxonomic placement follows Evans (1927 & 1949), Larsen (1987–88), Gaonkar (1996), Kunte et al. (2021), and Sadasivan & Sengupta 2023 (in press). Geographical divisions and landscapes follow Sankar (2013) with necessary modifications. In this paper we have classified the occurrence data based on transect encounters with the status as Very Common (VC) if seen in >75% of transects, Common (C) if seen in 50–75%, Not Rare (NR) if seen in 25–50% transects, Rare (R) in a case seen in 5–25%, and Very Rare (VR) if seen in <5% of the transects. Doubtful records are mentioned under the discussion part of each family. Species of the genera *Mycalasis*, *Nacaduba*, *Pelopidas*, and *Potanthus* were identified based on examination of male brands, observation & rearing of early stages, and examination of the male genitalia of specimens outside protected

areas adjoining the study region. Detailed analysis of transects with biodiversity indices and conservation values shall be published elsewhere. The global conservation status data was derived from the IUCN site <http://www.iucnredlist.org> (IUCN 2021). Indian Wildlife Protection Act (WPA) 1972 and its amendments till 2022 as the Wildlife (Protection) Amendment Act 2002 has been consulted to arrive at the species listed under the schedules.

## RESULTS AND DISCUSSION

Western Ghats has 335 species and Kerala state has 326 species as per the latest estimates (Sadasivan & Sengupta 2023, in press; Sadasivan et al. 2023, in press). We found 290 species of butterflies from SVNP and its buffer zone. This included 19 species of Papilionidae, 26 species of Pieridae, 85 species of Nymphalidae, one species of Riodinidae, 82 Lycaenidae, and 77 species of Hesperidae (Figure 1A). We found 269 species from inside the boundaries of the core of SVNP, while an additional 21 species were confirmed from its buffer zone. The records of 13 species need further confirmation.

Analysis of historical works in the SVNP and adjoining

**Image 2. Major vegetation types of SVNP: A—Southern Montane Wet Temperate Forests at Sispara | B—Southern Montane Wet Grasslands at Sispara | C—West Coast Tropical Evergreen Forests at Walakkad | D—Southern Sub-tropical Hill Forests Poochipara | E—West Coast Semi Evergreen Forests at Sairandhri | F—Dry Deciduous Scrub jungle at Attapady. © M. Divin Murukesh.**

regions suggests the high diversity of butterflies. From the Nilgiri region, Hampson (1888) had 260 valid taxa, Yates (1935) included 282 species, Wynter-Blyth mentioned 290 species, and Larsen (1987–88) had 299 species. From the SVNP on the western slopes of the

Nilgiris, we see that Mathew & Rahamathulla (1993), Mathew (1994, 1999), and Mathew & Binoy (2002) reported around 100 species. In this study, we report 290 species, a more realistic aggregate for a highly biodiverse region like SVNP. The reason for the lesser

**Figure 1. A—Family wise distribution of species in SVNP and Kerala | B—Number of species in the schedules of the WPA 1971 Kerala and SVNP | C—Number of species in the Red List of IUCN from Kerala and SVNP.**

total compared to Nilgiris proper may be due to less land area and the absence of pure dry scrub vegetation in SVNP that harbours quite a few arid species in the northern slopes of Nilgiris.

All 19 species of Papilionidae seen in the Western Ghats and Kerala are recorded at SVNP. This includes the three strict Western Ghat endemics namely *Pachliopta pandiyana* (Moore, 1881), *Papilio liomedon* Moore, [1875] and *Papilio buddha* Westwood, 1872. All three species of peacocks *Papilio paris tamilana* Moore, 1881, *P. buddha* Westwood, 1872 and *P. crino* Fabricius, 1793 are seen in the region. Three species were not recorded in the core but were recorded from the buffer zone—*Graphium antiphates naira* (Moore, [1903]) from the northwestern wet zone and *Graphium nomius nomius* (Esper, 1799) and *Papilio crino* from the southeastern part of the dry zone.

In Pieridae only 26 species were documented in the core and buffer of SVNP. This includes the endemics *Eurema (Terias) nilgiriensis* (Yata, 1990), *Colias nilagiriensis* Felder & Felder, 1859 (Image 3A), and *Appias wardii* (Moore, 1884). Though absent inside SVNP, *Colotis amata* (Fabricius, 1775), *C. aurora* (Cramer, [1780]), *C. danae danae* (Fabricius, 1775), *C. etrida etrida* (Boisduval, 1836), and *C. fausta fulvia* (Wallace, 1867), were reported from the drier south-eastern border of the buffer zone. The presence of these straggler species in the SVNP needs further confirmation. These species are also listed in a paper on butterflies of Anaikatti, a region adjoining the south-eastern part of the SVNP (Selvaraj & Arun 2014). There are also reports of *Appias lalage lalage* (Doubleday, 1842), from Walakkad and Mukurthi.

Out of the 97 species of Nymphalidae in Kerala and the 100 in WG, SVNP and its environs have 85 species, including the following 12 Western Ghat endemics – *Parantirrhoea marshalli* Wood-Mason, 1881, *Kallima horsfieldii* Kollar, [1844], *Idea malabarica* (Moore, 1877), *Zipaetis saitii* Hewitson, 1863, *Cethosia mahratta* Moore, 1872 were from the wetter north-western Nilambur slopes; while *Mycalesis igilia* Fruhstorfer, 1911, *Mycalesis orcha* Evans, 1912, *Ypthima tabella* Marshall & de Nicéville, 1883 were from the grasslands; and *Telinga adolpheii* (Guérin-Méneville, 1843) (Image 3E), *Ypthima chenu* (Guérin-Méneville, 1843) (Image 3C), *Argynnis hybrida* (Evans, 1912) (Image 3B), and *Parantica nilgiriensis* (Moore, 1877) (Image 3D), were recorded from Sispara region and adjoining Murkurthi border. *Ypthima asterope mahratta* Moore, 1884, and *Ypthima ceylonica* Hewitson, 1865 are included based on their records from the dry southeast. Three species from the dry southeast zone *Byblia ilithyia* (Drury, [1773]), *Charaxes agraria* Swinhoe, 1887, and *Symphaedra nais* (Forster, 1771), are needing further confirmation.

Of the two species of Riodinidae reported from the WG, only *Abisara bifasciata suffusa* Moore, 1882, was observed in the region. *Abisara echerius prunosa* Moore, 1879, is yet to be found here.

Lycaenidae was represented by 82 out of the 94 species in Kerala and 98 in the Western Ghats. Three strict endemic species reported were *Celatoxia albidisca* (Moore, [1884]), *Arhopala alea* (Hewitson, 1862), and *Curetis siva* Evans, 1954. Two species were included based on our records from the buffer zone, namely, *Nacaduba calauria evansi* Toxopeus, 1927, and *Thaduka multicaudata kanara* Evans, 1925; and three species from the south-west dry zone— *Hypolycaena nilgirica* Moore, [1884], *Tajuria jehana jehana* Moore, [1884],

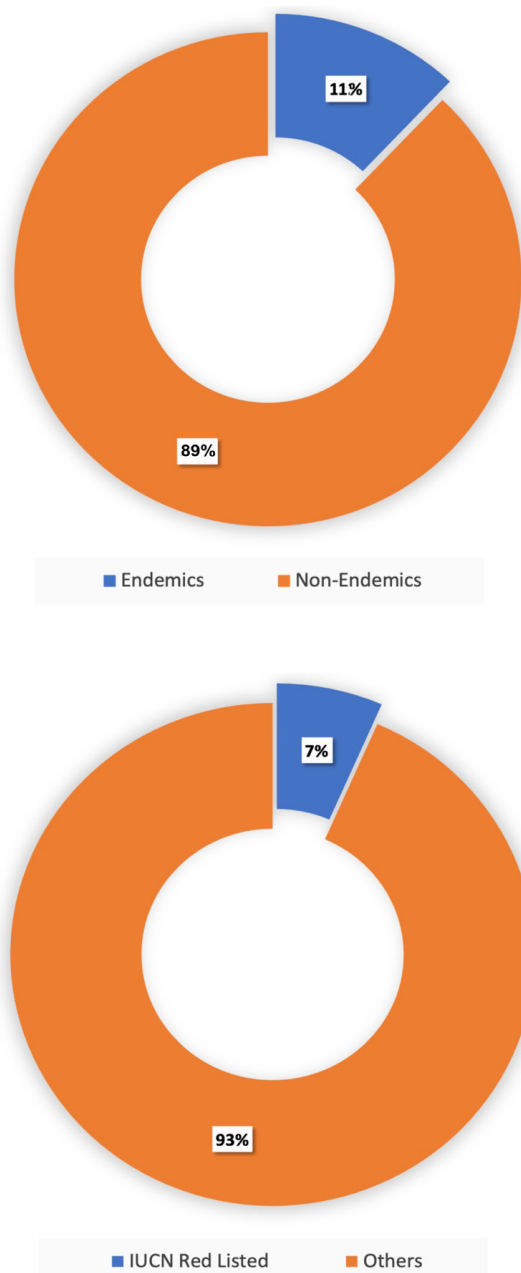

Figure 2. Species composition with respect to endemism and IUCN Threatened list status: A—Endemics and non-endemics in SVNP | B— IUCN Red Listed and others.

and *Ancema sudica* (Evans, 1926). However, *Freyeria trochylus* (Freyer, 1845), *Arhopala bazaloides bazaloides* (Hewitson, 1878), *Tajuria maculatus* (Hewitson, 1865), and *Tajuria melastigma* de Nicéville, 1887, known from the adjacent Nilgiris and Nilambur valley are still unrecorded inside SVNP. *Udara akasa mavisa* (Fruhstorfer, 1917) (Image 3F), was common in the shola-grasslands of the region.

Seventy-seven species of HesperIIDae out of 82 in Kerala and Western Ghats were observed in SVNP.

Both the endemic grassland-dependent Hedgehoppers *Baracus hamptoni* Elwes & Edwards, 1897, and *B. subditus* Moore, [1884] were recorded. The grassland species *Arnetta mercara* Evans, 1932, was not uncommon. *Quedara basiflava* (de Nicéville, [1889]), *Halpemorpha hyrtacus* (de Nicéville, 1897), *Halpe hindu* Evans, 1937, *Thoressa astigmata* (Swinhoe, 1890) (Image 3G), and *Thoressa honorei* (de Nicéville, 1887) were recorded in the wetter north-western slopes. *Thoressa sitala* (de Nicéville, 1885), *Oriens concinna* (Elwes & Edwards, 1897), and *Caltoris canaraica* (Moore, [1884]) (Image 3H), were found in the higher reaches >1200 m ASL. *Sarangesa purendra hopkinsi* Evans, 1921, *Caprona alida vespa* Evans, 1949 and *Aeromachus dubius dubius* Elwes & Edwards, 1897 were absent. While *Gerosis bhagava bhagava* (Moore, [1866]), and *Gomalia elma albofasciata* Moore, 1879, were found in the dry zone; *Spialia galba* (Fabricius, 1793), *Zographetus ogygia ogygia* (Hewitson, [1866]), *Cephrenes acalle oceanica* (Mabille, 1904), *Taractrocera maevius* (Fabricius, 1793), *Telicota colon colon* (Fabricius, 1775), *Baoris farri* (Moore, 1878), *Caltoris kumara kumara* (Moore, 1878), *Caltoris philippina philippina* (Herrich-Schäffer, 1869), and *Pelopidas conjuncta narooa* (Moore, 1878) were added from the northwest zone near the Nilambur slopes.

### Endemicity

Sixty species out of the 290 species in SVNP and environs had some element of endemism, of which 31 species were strictly endemic to the Western Ghats. Thus 11% of the butterflies in SVNP are WG endemics (Figure 3A). This is out of the 38 species that are currently considered strictly restricted to the Western Ghats. Thus, it hosts 82% of all the butterflies listed as strictly endemic to the Western Ghats. Of these, *Telinga adolpheii*, *Argynnis hybrida*, *Mycalesis igilia*, *Mycalesis orcha*, and *Thoressa sitala* are montane endemics seen only in this Nilgiris-Coorg landscape of Western Ghats (Table 1). Since geographically restricted to a very small landscape inside the WG, they must be considered super-endemics.

### IUCN Red List

SVNP and its environs had 19 species (6.55% of its butterfly fauna) listed in the IUCN Red List (Figure 1C, 2B). Seventeen species are listed under Least Concern and two species namely *Idea malabarica* and *Parantica nilgiriensis* are under the Near Threatened category. Except *Gomalia elma albofasciata* all others were listed inside the core zone (See Appendix I).

Table 1. Family-wise list of endemic species and their known distribution.

## WPA 1972

Of the 69 species of butterflies protected under the WPA 1972 in Kerala, and 70 in WG, SVNP had 63 species under the schedules (Figure 1B). Thus 21.72% of all its butterfly fauna is under the WPA. The region also holds 91% of the species listed under WPA known from Kerala and 90% of those listed from WG. Under Schedule I there are four species, one species is under both Schedule I

	Family	Taxon	Endemicity*
31	Nymphalidae	<i>Kallima horsfieldii</i> Kollar, [1844]	WG
32	Nymphalidae	<i>Idea malabarica</i> (Moore, 1877)	WG

&II, 58 species are under Schedule II (See Appendix I).

## CONCLUSIONS

With 269 species inside the core and with 290 species as an aggregate including the adjoining buffer zones (21 species), SVNP is one of the richest regions

Image 3. Some butterfly species endemic to Western Ghats and southern India recorded from SVNP: A—*Colias nilagiriensis* Felder & Felder, 1859 | B—*Argynnis hybrida* (Evans, 1912) | C—*Ypthima chenu* (Guérin-Méneville, 1843) | D—*Parantica nilgiriensis* (Moore, 1877) | E—*Telinga adolphe* (Guérin-Méneville, 1843) | F—*Udara akasa mavisa* (Fruhstorfer, 1917) | G—*Thoressa astigmata* (Swinhoe, 1890) | H—*Caltoris canaraica* (Moore, [1884]). © Kalesh Sadasivan.

with respect to butterflies. The region harbours 89% of all butterflies of Kerala (326 species) and 87% of those in the Western Ghats (335 species). Eleven percent of its butterfly fauna is endemic to the Western Ghats. It hosts 82% of all butterflies listed as endemic to the Western Ghats. Around 96% of all the IUCN Red listed species in Kerala and WG and 90 % of species listed in WPA from WG and 91% of them from Kerala are also found in the region. The diversity of the region with 290 species is much more than that of states like Goa (267 species), Maharashtra (257) species and Gujarat (169 species) along the Western Ghats. SVNP and its environs have rich butterfly diversity. The buffer zone has good diversity and significantly adds to the butterfly fauna of the core of SVNP. More areas from the drier southeast and the wet evergreen region to the northwest may be incorporated into the National Park, thereby preserving the remaining tracts of benchmark evergreen forests of southern India.

Dr. Priyadarsanan Dharma Rajan, Ashoka Trust for Research in Ecology and the Environment (ATREE), Royal Enclave, Bangalore, Karnataka, India

#### Fishes

Dr. Neelesh Dahanukar, IISER, Pune, Maharashtra, India  
Dr. Topiltzin Contreras MacBeath, Universidad Autónoma del estado de Morelos, México  
Dr. Heok Hee Ng, National University of Singapore, Science Drive, Singapore  
Dr. Rajeev Raghavan, St. Albert's College, Kochi, Kerala, India  
Dr. Robert D. Sluka, Chiltern Gateway Project, A Rocha UK, Southall, Middlesex, UK  
Dr. E. Vivekanandan, Central Marine Fisheries Research Institute, Chennai, India  
Dr. Davor Zanella, University of Zagreb, Zagreb, Croatia  
Dr. A. Biju Kumar, University of Kerala, Thiruvananthapuram, Kerala, India  
Dr. Akhilesh K.V., ICAR-Central Marine Fisheries Research Institute, Mumbai Research Centre, Mumbai, Maharashtra, India  
Dr. J.A. Johnson, Wildlife Institute of India, Dehradun, Uttarakhand, India  
Dr. R. Ravinesh, Gujarat Institute of Desert Ecology, Gujarat, India

#### Amphibians

Dr. Sushil K. Dutta, Indian Institute of Science, Bengaluru, Karnataka, India  
Dr. Annemarie Ohler, Muséum national d'Histoire naturelle, Paris, France

#### Reptiles

Dr. Gernot Vogel, Heidelberg, Germany  
Dr. Raju Vyas, Vadodara, Gujarat, India  
Dr. Pritpal S. Soorae, Environment Agency, Abu Dhabi, UAE.  
Prof. Dr. Wayne J. Fuller, Near East University, Mersin, Turkey  
Prof. Chandrashekher U. Rivonker, Goa University, Taleigao Plateau, Goa, India  
Dr. S.R. Ganesh, Chennai Snake Park, Chennai, Tamil Nadu, India  
Dr. Himansu Sekhar Das, Terrestrial & Marine Biodiversity, Abu Dhabi, UAE

#### Birds

Dr. Hem Sagar Baral, Charles Sturt University, NSW Australia  
Mr. H. Byju, Coimbatore, Tamil Nadu, India  
Dr. Chris Bowden, Royal Society for the Protection of Birds, Sandy, UK  
Dr. Priya Davidar, Pondicherry University, Kalapet, Puducherry, India  
Dr. J.W. Duckworth, IUCN SSC, Bath, UK  
Dr. Rajah Jayapal, SACON, Coimbatore, Tamil Nadu, India  
Dr. Rajiv S. Kalsi, M.L.N. College, Yamuna Nagar, Haryana, India  
Dr. V. Santharam, Rishi Valley Education Centre, Chittoor Dt., Andhra Pradesh, India  
Dr. S. Balachandran, Bombay Natural History Society, Mumbai, India  
Mr. J. Praveen, Bengaluru, India  
Dr. C. Srinivasulu, Osmania University, Hyderabad, India  
Dr. K.S. Gopi Sundar, International Crane Foundation, Baraboo, USA  
Dr. Gombobaatar Sundev, Professor of Ornithology, Ulaanbaatar, Mongolia  
Prof. Reuven Yosef, International Birding & Research Centre, Eilat, Israel  
Dr. Taej Mundkur, Wetlands International, Wageningen, The Netherlands  
Dr. Carol Inskipp, Bishop Auckland Co., Durham, UK  
Dr. Tim Inskipp, Bishop Auckland Co., Durham, UK  
Dr. V. Gokula, National College, Tiruchirappalli, Tamil Nadu, India  
Dr. Arkady Lelej, Russian Academy of Sciences, Vladivostok, Russia  
Dr. Simon Dowell, Science Director, Chester Zoo, UK  
Dr. Mário Gabriel Santiago dos Santos, Universidade de Trás-os-Montes e Alto Douro, Quinta de Prados, Vila Real, Portugal  
Dr. Grant Connette, Smithsonian Institution, Royal, VA, USA  
Dr. M. Zafar-ul Islam, Prince Saud Al Faisal Wildlife Research Center, Taif, Saudi Arabia

#### Mammals

Dr. Giovanni Amori, CNR - Institute of Ecosystem Studies, Rome, Italy  
Dr. Anwaruddin Chowdhury, Guwahati, India  
Dr. David Mallon, Zoological Society of London, UK  
Dr. Shomita Mukherjee, SACON, Coimbatore, Tamil Nadu, India  
Dr. Angie Appel, Wild Cat Network, Germany  
Dr. P.O. Nameer, Kerala Agricultural University, Thrissur, Kerala, India  
Dr. Ian Redmond, UNEP Convention on Migratory Species, Lansdown, UK  
Dr. Heidi S. Riddle, Riddle's Elephant and Wildlife Sanctuary, Arkansas, USA  
Dr. Karin Schwartz, George Mason University, Fairfax, Virginia.  
Dr. Lala A.K. Singh, Bhubaneswar, Orissa, India  
Dr. Mewa Singh, Mysore University, Mysore, India  
Dr. Paul Racey, University of Exeter, Devon, UK  
Dr. Honnavalli N. Kumara, SACON, Anaikatty P.O., Coimbatore, Tamil Nadu, India  
Dr. Nishith Dharaiya, HNG University, Patan, Gujarat, India  
Dr. Spartaco Gippoliti, Socio Onorario Società Italiana per la Storia della Fauna "Giuseppe Altobello", Rome, Italy  
Dr. Justus Joshua, Green Future Foundation, Tiruchirappalli, Tamil Nadu, India  
Dr. H. Raghuram, The American College, Madurai, Tamil Nadu, India  
Dr. Paul Bates, Harison Institute, Kent, UK  
Dr. Jim Sanderson, Small Wild Cat Conservation Foundation, Hartford, USA  
Dr. Dan Challenger, University of Kent, Canterbury, UK  
Dr. David Mallon, Manchester Metropolitan University, Derbyshire, UK  
Dr. Brian L. Cypher, California State University-Stanislaus, Bakersfield, CA  
Dr. S.S. Talmale, Zoological Survey of India, Pune, Maharashtra, India  
Prof. Karan Bahadur Shah, Budhanilakantha Municipality, Kathmandu, Nepal  
Dr. Susan Cheyne, Borneo Nature Foundation International, Palangkaraja, Indonesia  
Dr. Hemanta Kafley, Wildlife Sciences, Tarleton State University, Texas, USA

#### Other Disciplines

Dr. Aniruddha Belsare, Columbia MO 65203, USA (Veterinary)  
Dr. Mandar S. Paingankar, University of Pune, Pune, Maharashtra, India (Molecular)  
Dr. Jack Tordoff, Critical Ecosystem Partnership Fund, Arlington, USA (Communities)  
Dr. Ulrike Streicher, University of Oregon, Eugene, USA (Veterinary)  
Dr. Hari Balasubramanian, EcoAdvisors, Nova Scotia, Canada (Communities)  
Dr. Rayanna Hellem Santos Bezerra, Universidade Federal de Sergipe, São Cristóvão, Brazil  
Dr. Jamie R. Wood, Landcare Research, Canterbury, New Zealand  
Dr. Wendy Collinson-Jonker, Endangered Wildlife Trust, Gauteng, South Africa  
Dr. Rajeshkumar G. Jani, Anand Agricultural University, Anand, Gujarat, India  
Dr. O.N. Tiwari, Senior Scientist, ICAR-Indian Agricultural Research Institute (IARI), New Delhi, India  
Dr. L.D. Singla, Guru Angad Dev Veterinary and Animal Sciences University, Ludhiana, India  
Dr. Rupika S. Rajakaruna, University of Peradeniya, Peradeniya, Sri Lanka  
Dr. Bahar Baviskar, Wild-CER, Nagpur, Maharashtra 440013, India

#### Reviewers 2019–2021

Due to paucity of space, the list of reviewers for 2018–2020 is available online.

The opinions expressed by the authors do not reflect the views of the Journal of Threatened Taxa, Wildlife Information Liaison Development Society, Zoo Outreach Organization, or any of the partners. The journal, the publisher, the host, and the partners are not responsible for the accuracy of the political boundaries shown in the maps by the authors.

**Journal of Threatened Taxa** is indexed/abstracted in Bibliography of Systematic Mycology, Biological Abstracts, BIOSIS Previews, CAB Abstracts, EBSCO, Google Scholar, Index Copernicus, Index Fungorum, JournalSeek, National Academy of Agricultural Sciences, NewJour, OCLC WorldCat, SCOPUS, Stanford University Libraries, Virtual Library of Biology, Zoological Records.

NAAS rating (India) 5.64

Print copies of the Journal are available at cost. Write to:

OPEN ACCESS

The Journal of Threatened Taxa (JoTT) is dedicated to building evidence for conservation globally by publishing peer-reviewed articles online every month at a reasonably rapid rate at [www.threatenedtaxa.org](http://www.threatenedtaxa.org). All articles published in JoTT are registered under [Creative Commons Attribution 4.0 International License](https://creativecommons.org/licenses/by/4.0/) unless otherwise mentioned. JoTT allows unrestricted use, reproduction, and distribution of articles in any medium by providing adequate credit to the author(s) and the source of publication.

**Sunda Clouded Leopard *Neofelis diardi* (Cuvier, 1823) (Mammalia: Carnivora: Felidae) occupancy in Borneo: results of a pilot vehicle spotlight transect survey**  
– Jephthe Sompud, Sze Lue Kee, Kurtis Jai-Chyi Pei, Paul Liao, Collin Goh & Anthony J. Giordano, Pp. 22559–22566

**On the occurrence of Eurasian Otter *Lutra lutra* (Carnivora: Mustelidae) in Neeru stream of Chenab catchment, Jammu & Kashmir, India**  
– Dinesh Singh, Anil Thakar & Neeraj Sharma, Pp. 22567–22573

**Distribution of avifauna on twenty-one islands of the Gulf of Mannar Biosphere Reserve, India**  
– H. Byju, N. Raveendran & S. Ravichandran, Pp. 22574–22585

**Habitats of House Sparrow *Passer domesticus* (Linnaeus, 1758) in Rameswaram Island, Tamil Nadu, India**  
– M. Pandian, Pp. 22586–22596

**Seasonal diversity and dietary guild structure of birds in two Vindhyan gorge forests of Rajasthan, India**  
– Ashvini Kumar Joshi, Pp. 22597–22605

**Differential kleptoparasitic interactions of Himalayan Vulture *Gyps himalayensis* with conspecifics and heterospecifics during various stages of breeding**  
– Hameem Mushtaq Wani, Pp. 22606–22610

**Range extension of *Isthmoheros tuyenensis*, a threatened species of fish (Cichlidae) in Panama: including new ecological and morphological data**  
– Arturo Dominici-Arosemena, Arturo Angulo, Haydee Osorio-Ugarte, Quiriatjaryn Ortega-Samaniego, Andrés Fraiz, Arminda Guerrel, Edgar Araúz, Jennyfer Montiel, Beatriz Medina, Yehudi Rodríguez-Arriatti, Yessenia González, Javier Pardo, Karly Urriola & Adrián Ramos-Merchante, Pp. 22611–22622

**Tadpole morphology of Jerdon's Narrow-mouthed Frog *Uperodon montanus* (Jerdon, 1853) with a range and elevation extension report from Western Ghats, India**  
– Amit Hegde, Girish Kadadevaru & K.P. Dinesh, Pp. 22623–22631

**An annotated checklist of the economically important family of moths (Lepidoptera: Heterocera: Noctuidae) of the northern Western Ghats, India, with notes on their type species, diversity, distribution, host plants, and an unusual new faunistic record**  
– Aparna Sureshchandra Kalawate, Prachee Surwade & S.N. Pawara, Pp. 22632–22653

**Report of a tussock moth genus *Maeoproctis* (Lepidoptera: Erebiidae: Lymantriinae: Nygmiini) from India**  
– Gagan Preet Kour Bali & Amritpal Singh Kaleka, Pp. 22654–22660

**Butterflies of Silent Valley National Park and its environs, Western Ghats of Kerala, India**  
– Kalesh Sadasivan, P.C. Sujitha, Toms Augustine, Edayillam Kunhikrishnan, Vinayan P. Nair, M. Divin Murukesh & Baiju Kochunarayanan, Pp. 22661–22676

**Notes on morphology and bionomics of *Urolabida histrionica* (Westwood) (Heteroptera: Urostylididae) from Assam, India**  
– Sachin Ranade & Hemant V. Ghate, Pp. 22677–22685

**Andromonoecy functional through heterostyly and large carpenter bees as principal pollinators in *Solanum carolinense* L. (Solanaceae)**  
– Suvarna Raju Palathoti & Aluri Jacob Solomon Raju, Pp. 22686–22694

**An inventory of endemic and near endemic angiosperm flora of Biligiri Rangaswamy Temple Tiger Reserve, peninsular India**  
– J. Jayanthi, Pp. 22695–22717

**Multidimensional time-lapse of a relict species *Canarium strictum* Roxb. from a sacred landscape in Pune District, India**  
– Mukul Mahabaleshwarkar, Nivedita Ghayal, Supriya Mahabaleshwarkar & Vinaya Ghate, Pp. 22718–22725

**Rediscovery of *Sewardiella tuberifera* Kash., a long-lost monotypic endemic Indian liverwort**

– Sapana Pant, S.D. Tewari, Prachi Joshi, Manisha Bhandari & Richa Arya, Pp. 22726–22730

***Physcomitrium euryostomum* Sendtn. (Funariaceae: Bryophyta) and *Splachnobryum obtusum* (Brid.) Müll. Hal. (Splachnobryaceae: Bryophyta), two rare moss species from the Western Ghats of Kerala**  
– C. Nair Manju, P.M. Vineesha, B. Mufeed & K.P. Rajesh, Pp. 22731–22736

**Short Communications**

**First record of the Great Seahorse *Hippocampus kelloggi* Jordan & Snyder, 1901 (Actinopterygii: Syngnathiformes: Syngnathidae) from the northwestern coast of Bay of Bengal**  
– Anil Kumar Behera, Biswajit Mahari & Amrit Kumar Mishra, Pp. 22737–22740

***Schoenoplectiella erecta* (Poir.) Lye ssp. *raynalii* (Schuyler) Beentje (Cyperaceae) – a new record to India from Ossudu Bird Sanctuary, Villupuram District, Tamil Nadu**  
– Chandrasegrane Pradeep, Paneerselvam Umamaheswari, Natesan Balachandran & Raphael Mathevet, Pp. 22741–22745

**Notes**

**Status of the Sumatran Striped Rabbit *Nesolagus netscheri* in Isau-Isau Wildlife Reserve, South Sumatra Province, Indonesia**  
– Arum Setiawan, Muhammad Iqbal, Octavia Susilowati, Doni Setiawan, Martialis Puspito Khristy Maharsi & Indra Yustian, Pp. 22746–22748

**Photographic record of the butterfly ray *Gymnura cf. poecilura* (Myliobatiformes: Gymnuridae) from the Bhagirathi-Hooghly River in West Bengal, eastern India**  
– Priyanka Chakraborty, Pp. 22749–22751

**First report of the fairyfly *Schizophragma mitai* Triapitsyn (Hymenoptera: Mymaridae) from India with notes on *S. indica* Rehm & Anis**  
– Anandhan Rameshkumar, Nazarius Anand, Sayan Sardar & Sarfrazul Islam Kazmi, Pp. 22752–22756

**Occurrence of *Ranunculus sceleratus* L. (Ranunculaceae) from the Nilgiri District, Tamil Nadu, India**  
– J. Shashikanth, S. Mugendhiran & Digvijay Verma, Pp. 22757–22760

**First report of *Meliola panici* on *Ottochloa nodosa* (Kunth) Dandy (Poaceae)**  
– Gopinathan Nair Gokul & Jacob Thomas, Pp. 22761–22763

**New record of an usneoid lichen *Usnea hirta* (L.) Weber ex F.H. Wigg. from India**  
– K.S. Vinayaka, Archana R. Mesta & N. Rajeshwari, Pp. 22764–22766

**On the occurrence of two species of rare cyanobacterial genus *Petalonema* M.J. Berkeley ex Wolle, 1887 (Cyanophyceae: Nostocales: Scytonemataceae) from eastern Himalaya, India**  
– Jai Prakash Keshri, Narendra Nath Koley & Jay Mal, Pp. 22767–22770
